Hello, I'm Peter

I turn ideas into seamless digital experiences. With a strong foundation in UI/UX design and hands-on experience in React development, I craft modern, scalable, and user-friendly websites. My goal is to bridge design and code — ensuring that every interface not only looks great but performs flawlessly.

About Me

Look at My Work

Who am I?

I'm a Computer Science student living in Czechia. I'm passionate about designing and building modern web experiences. I'm particularly interested in combining the principles of UI/UX design with front-end development.

My primary technologies for building robust web applications include React, TypeScript, and Tailwind CSS. I also use Figma for designing user-friendly interfaces and seamless user experiences. I'm a lifelong learner who's constantly looking for ways to hone my skills and expand my knowledge of the latest technologies for improving the user experience as well as the quality of my code.
